

# STAGING

## Product Information

Standard stage platform constructed using steel truss frame with high quality  $\frac{3}{4}$ " plywood tops. Tops are insulated from frames to reduce noise and vibration. 4'x8' modular design means stages can be erected in a variety of shapes and sizes.

Standard platform height is 1ft or 2ft, but other options are also available.

A stair unit can be added to deck.

## Important information

A 4' x 8' staging platform weighs approximately 150 lbs and supports an evenly distributed load of more than 4,000 lbs.

All decks higher than 3' high require a guardrail installation.
